Slide notes

Here we have a current Report that we are working with. When we use the SAVE function, the Report is saved in its latest format, and then the Report is exited.

Slide notes

We also have an 'Interim Save' function, and this one we can use to save our work while working with the Report, because although the latest form of the Report is saved, we still stay with the same Report to continue working with it.

Slide notes

So whenever we do a certain amount of work on the Report, or the Tags, or the Layout, it is a good idea to use the 'interim save' and then continue working.
