

## Slide 1 - Slide 1

## Slide notes

A Custom Pre Run is a new Screen that may include new Fields for prompting the User when performing a DocWriter Report.

**Slide 2 - Slide 2**

The screenshot shows the IES Client v8.29: My IES interface. The top menu bar includes Help, Submit, Quit, Functions, and Commands. Below the menu is a toolbar with icons for key, help, search, heart, clock, left arrow, right arrow, list, document, refresh, checkmark, and close. The main window has a tabbed interface with four tabs: 1 Console, 2 Pre Run (selected), 3 The Tags, and 4 Options.

**Slide 3 - Slide 3****Slide notes**

On the Pre Run Assist, we have an option to tell us more about a Custom Pre Run.

**Slide 4 - Slide 4**

The screenshot shows the IES Client v8.29 interface. The title bar reads 'IES Client v8.29 : My IES'. The menu bar includes 'Help', 'Submit', 'Quit', 'Functions', and 'Commands'. The toolbar contains icons for key, help, search, heart, clock, left arrow, right arrow, list, print, refresh, checkmark, and close. The main content area is titled 'Document' and contains the following text:

Making your own Pre Run: -  
-----

It is quite feasible to make your own Pre Run. If you are an Accountant or User of IES but not an IT person, you may have the ability but not necessarily the 'knowledge', and you may have to request help from IT or your Service Provider.

If you are an IT person with IES Developer knowledge and skills, then the process is quite simple: -

01) Make a new Screen Object where the anchor file is "docwritespre", and you may use any of the existing Field Objects or even define new or additional fields (do not change any of the existing objects!). The "key" will be "user" or "port". On the screen, you will collect the required information from the User by means of field input objects.

02) Register the Screen Object in the Menu Process Library, and check it for 'Pre Run with Reports'. The Pre Run will then automatically appear with the standard Pre Run choices when you use "Pre Run Assist".

On the right side of the document, there is a 'Next' link, a 'Make a copy -' button, a 'Text Copy' link, a 'Search Phrase' input field, and a 'Search' link. At the bottom, there is a 'Doc Key' field containing the text 'docwrites-prerun-how'.

**Slide notes**

The IES Developer Objects provide everything we need, as long as we have the expertise to do it.

**Slide 5 - Slide 5**

The screenshot shows the IES Client v8.29 interface. The title bar reads 'IES Client v8.29 : My IES'. The menu bar includes 'Help', 'Submit', 'Quit', 'Functions', and 'Commands'. The toolbar contains icons for key, help, search, heart, clock, left arrow, right arrow, list, print, refresh, checkmark, and close. The main content area is titled 'Document' and contains the following text:

Making your own Pre Run: -  
-----

It is quite feasible to make your own Pre Run. If you are an Accountant or User of IES but not an IT person, you may have the ability but not necessarily the 'knowledge', and you may have to request help from IT or your Service Provider.

If you are an IT person with IES Developer knowledge and skills, then the process is quite simple: -

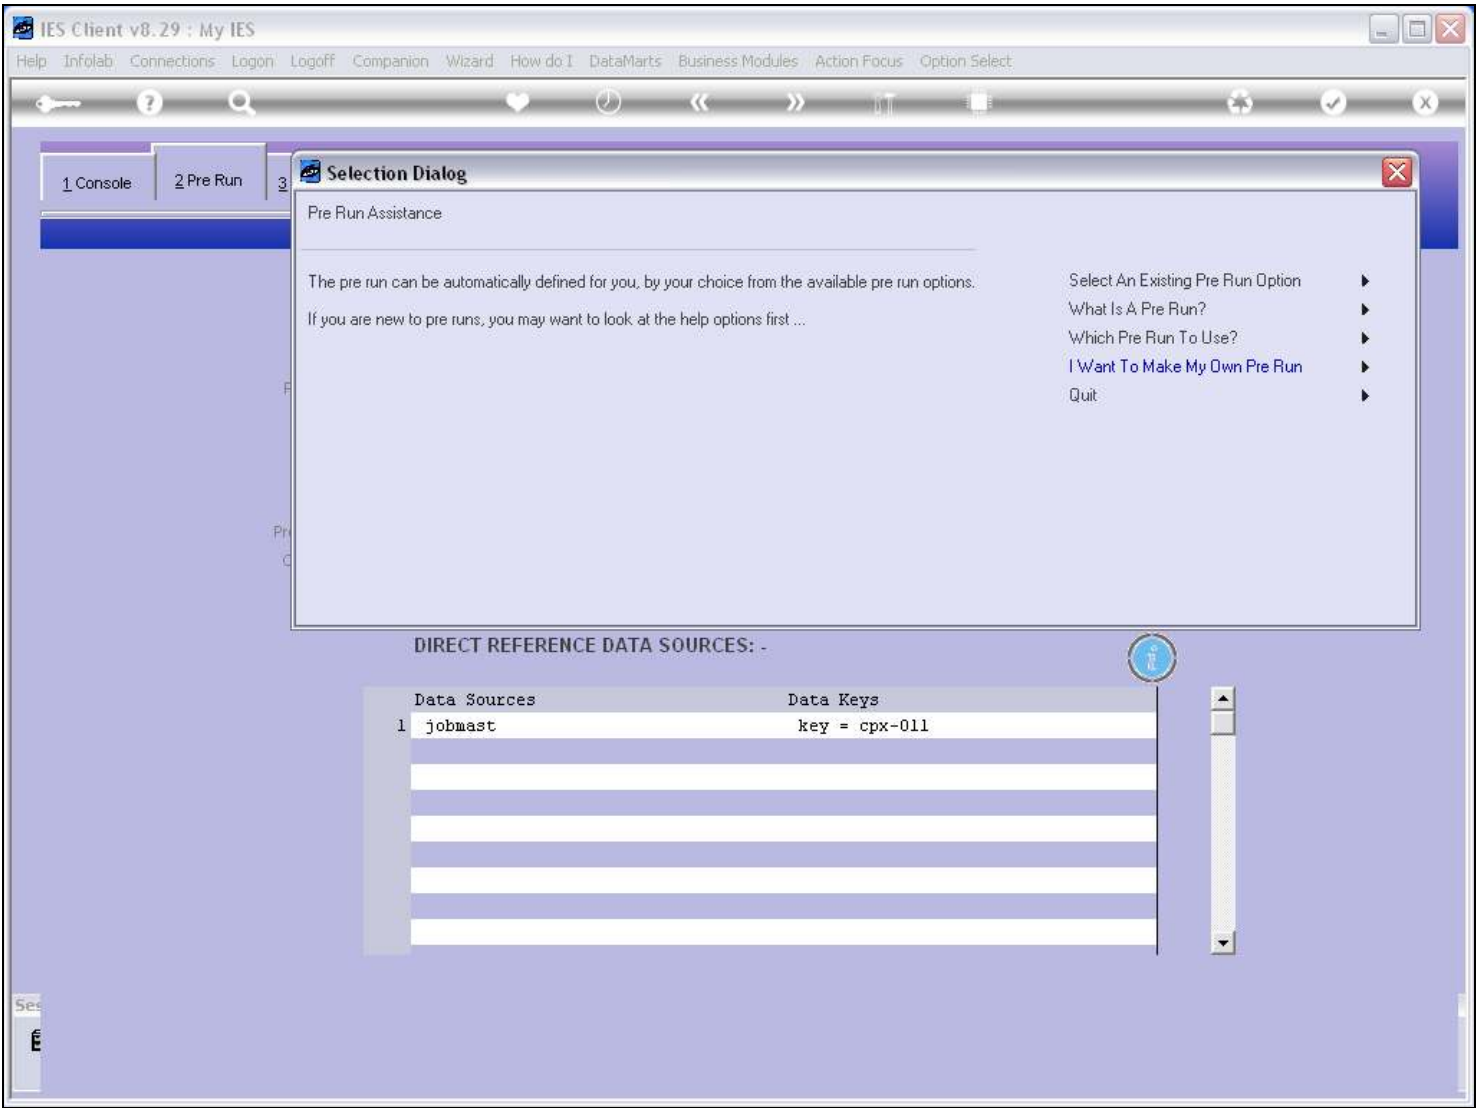

01) Make a new Screen Object where the anchor file is "docwritespre", and you may use any of the existing Field Objects or even define new or additional fields (do not change any of the existing objects!). The "key" will be "user" or "port". On the screen, you will collect the required information from the User by means of field input objects.

02) Register the Screen Object in the Menu Process Library, and check it for 'Pre Run with Reports'. The Pre Run will then automatically appear with the standard Pre Run choices when you use "Pre Run Assist".

On the right side of the document, there are links: 'Next' at the top right, 'Text Copy' next to 'Make a copy -', and 'Search' at the bottom right. Below 'Text Copy' is a 'Search Phrase' input field. At the bottom of the document, there is a 'Doc Key' field containing the text 'docwrites-prerun-how'.
