

Slide 1 - Slide 1

Slide notes

Income Statement, Balance Sheet and GL Management Reports are typical Reports that include a lot of Tags with GL Name Templates. These Templates do not require a Data Source to be stated, and there are 3 options available: Single, Double and Multi Rule. Our choice is determined by how many criteria we need to state to select the correct Accounts for the answer. In this example, we will use the GL Double Rule Template to extract the Current Month Sales total.

Slide notes

So in effect, our double rule in this example means that we select all GL Accounts where the ISPOS Flag on the Account is 20 or 22, because that means the Account is part of Sales.
