Slide 2
Slide notes:

Slide 3

Slide notes: This will always lead into the 'load factors' screen. Each Stock Item listed on the Order will be included here, and the purpose is to revise any load factors as necessary, but especially to introduce new load factors wherever it is stated as zero. An Item that has not been delivered before will have a zero factor. The purpose of the factor is to indicate how much crate space the item will use for a quantity of 1.
