Slide 1

Slide notes: A current Dispatch that we are working with has a target Delivery Date, and this Date is merely a projection of when we expect to execute this Delivery.

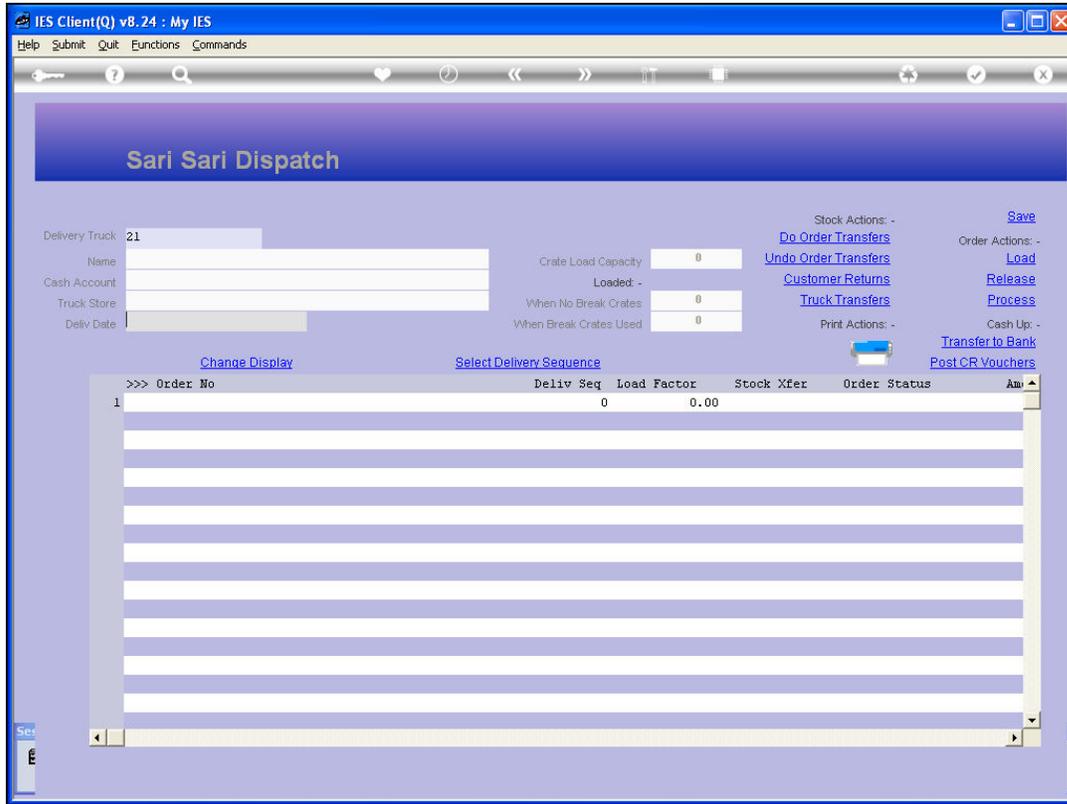

Slide 2

Slide notes: In the meantime, we could be working with this Dispatch Record on and off over the course of the day or even multiple days. We can leave the session and return many times. Although most changes on the Dispatch Record are automatically saved, it is still recommended that when we wish to interrupt the work and return later, just choose SAVE.
