System Health Check

-----Key Description-----
0001 Operational Health Check on Database "IESBUSINESS=IES BUSINESS"
    performed by Wico on 28/06/2010 at 14:21.
-----
0002 Most recent previous execution: -
    Set Up Health Check on database "IESBUSINESS=IES Business"
    performed by Barry on 28/04/2010 at 05:13.
-----
0003 Please check the following items: 0009 0007
0004
-----
0005 Critical transaction posting verification.
    file count: transreal = 22092
    file count: transrealval = 22092
    differential = 0

    All System Transactions pass through a file called 'transq' when posted,
    at which time the Financials are recorded in 'transrealval' and the
    parameters in 'transreal'. Therefore, these 2 Files, in a healthy system,
    should have the same Record Count.
0006 Data count of file=ATHAST
    prior measurement was on 28/04/2010 at 05:10.
    prior count = 22
    current count = 22
    data is the same as before.
0007 Data count of file=ATHASTI
    prior measurement was on 28/04/2010 at 05:10.
    prior count = 22
    current count = 22
    data is the same as before.
0008 Data count of file=DATAINDEX
    prior measurement was on 28/04/2010 at 05:10.
    prior count = 175
    current count = 90

The Data on this File should not shrink, except if you can explain this
```

Slide 5

Slide notes: Here we have our selected Report.
